

‘Heritage’ C-type

Body-Chassis *Plus*

Our body/chassis *plus* units have been developed from experiences gained after supplying 300+ similar units over the last 15 years. Certain areas of the build process were noted to be time consuming first time around, to this end our body/chassis *plus* unit covers these areas, the parts supplied and fitted are specifically deigned for our cars and would be needed to be acquired during this part of the assembly. All that is needed, is to install engine, gearbox and axles and the mechanical build up of the project is complete.

Chassis: Fully bracketed space frame similar to original to include steel front bulk-heads and aluminium skinned floors. Differential mounting hardware and corrected length rear lower wishbones and drive shafts (exchange), chassis and components are shot blasted and powder coated in silver finish.

Mechanical parts supplied and fitted

Braking: Fabricated pedals to include leg length adjustment, brake and clutch master cylinders to include Servo unit, hard and flexible brake lines including brake light switch installed, period handbrake and cable.

Steering: Steering column, steering knuckle, intermediate shaft and steering rack complete with track rod ends, Anti Roll Bar installed.

Misc: Replica Radiator and Fuel line.

Bodywork: Handcrafted composite panels to include bonnet with inner wheel arches and flush fit aluminium louvre panels, centre section with 1 or 2 door option and tail section including boot lid, engine bulkhead is clad using 16g aluminium.

The body is fitted to the chassis, bonnet, boot and door(s) are hinged with locks fitted, Fly-screen and mounting plinth are fitted as are the Headlamp covers.
